

Serial No. 10/695,227 - - - - 5

AMENDMENTS TO THE DRAWINGS

None.

REMARKS

Record Of Interview

The courtesies extended by Examiner Derakshani on April 12, 2006 in an interview with applicant Jason Hatton and attorney Paul Odell are gratefully acknowledged.

At the interview, attorney Odell proposed and/or agreed to the amendments presented herein, and pointed out that all of the rejected claims, with the amendments, set forth features not taught or suggested by the cited prior art. In particular, it was pointed out that the cited art U.S. Patent No. 6,216,916 did not show or suggest, inter alia, the resilient flange profiles set forth in independent claims 5 and 19, the non-linear connecting member set forth in independent claim 15, and the spacing between the housing retention structure and portions of the diaphragm as set forth in claim 10. The Examiner agreed, and stated he would conduct a further review and an update search as set forth in the Examiner's Interview Summary dated April 12, 2006.

Claims 1 and 4 are amended as discussed with the Examiner to change "liquid" to "fluid" to be consistent with the other claims. The term "fluid" is fully supported by the specification as originally filed.

Claim 10 was amended to correct an inadvertent interchange of phrases that were added to claim 10 in the previously filed RESPONSE AND AMENDMENT and that were inadvertently also interchanged in the discussion on page 18 of the previously filed RESPONSE AND AMENDMENT. The amended claim language remains inconsistent with the language in the originally filed specification section entitled 'BRIEF SUMMARY OF

Serial No. 10/695,227 - - - - 15

THE INVENTION.”

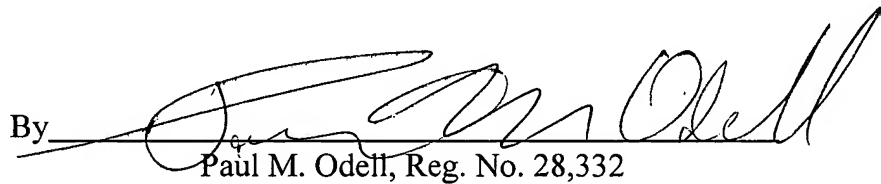

Pages 2 and 3 of the specification have been amended to delete some reference numbers that had been inadvertently listed in the “BACKGROUND OF THE INVENTION” section.

At the interview, attorney Odell showed the Examiner (1) copies of the recently filed First and Second Supplemental Information Disclosure Statements and the patents identified therein, and (2) samples of the invention as illustrated in the application drawings.

Respectfully submitted,

WOOD, PHILLIPS, KATZ, CLARK & MORTIMER
